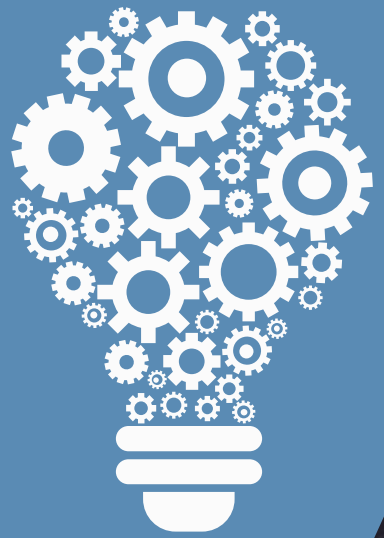
Banking Reimagined

Qloan | Qpay | Qcard

Core Banking systems form the backbone of any financial institution and are critical in the success of its mission



But require:

- significant upfront investment
- substantial initial setup time
- business experts with deep understanding of the industry and of the related regulations
- continuous adaptation

But even then:

The financial institution is not operational until this is integrated with a complex infrastructure and the rest of its systems

Banking As A Platform (BAAP)

Our Solution

Proven, Risk Free, WYSIWYG model

Based on a proven core banking model that can be provided immediately as demo to guarantee "what you see is what you get“ eliminating any ambiguity

Including all the components to be ready on day 1

Preconfigured and integrated with everything to be operational from the first day, at the same time safeguarding continuous adaptation to the latest updates

Ensuring focus is exclusively on the business

Fully managed end-to-end, in a 24x7 available, secure, compliant environment avoiding the need to have a team of experts

FinQubic

Banking Software Solution Should be

Our Vision

Inclusive & Flexible

Preconfigured with everything to get you started at your own model and able to grow on demand

Cost Sensitive

Avoiding large CapEx, based on an OpEx model and taking advantage of the pre-built components

Fully Managed

Fully managed end-to-end by a team of experts, in a 24x7 available, secure environment
